

As part of the annual compliance review, Omar Haddad from Crescent Bank Partners evaluated the effectiveness of the institution's KYC procedures.

The report outlines improvements to customer identity verification and transaction monitoring systems. Haddad highlighted that financial institutions must handle identifiers such as IBAN numbers carefully to ensure regulatory compliance.

In the demonstration example included in the report, a sample IBAN number TR12ABCD123456789012345678 was used.

Questions about the methodology can be directed to omar.haddad@crescent-example.com.
