

## Financial Access Survey: Glossary of Indicators

*This note provides an overview of indicators calculated using FAS data. These indicators are normalized in terms of land area, adult population, or Gross Domestic Product (GDP) to facilitate cross-country comparability when gauging countries' financial access (see complete list in Annex 1).*

*For information on key concepts, please refer to the IMF's Financial Access Survey Guidelines and Manual. Underlying data can be found on the [FAS website](#).*

### **FAS Indicators: Geographical Outreach**

**1. ATMs per 1,000 km<sup>2</sup>** denotes the total number of ATMs of all financial institutions for every 1,000 square kilometers in the reporting jurisdiction.

**2. ATMs per 100,000 adults** denotes the total number of ATMs of all financial institutions for every 100,000 adults in the reporting jurisdiction.

**3. Branches of all microfinance institutions per 1,000 km<sup>2</sup>** denotes the number of deposit taking and non-deposit taking microfinance institutions and their branches for every 1,000 square kilometers in the reporting jurisdiction.

**4. Branches of all microfinance institutions per 100,000 adults** denotes the number of deposit taking and non-deposit taking microfinance institutions and their branches for every 100,000 adults in the reporting jurisdiction.

**5. Branches of commercial banks per 1,000 km<sup>2</sup>** denotes the number of commercial banks and their branches for every 1,000 square kilometers in the reporting jurisdiction.

**6. Branches of commercial banks per 100,000 adults** denotes the number of commercial banks and their branches for every 100,000 adults in the reporting jurisdiction.

**7. Branches of credit unions and credit cooperatives per 1,000 km<sup>2</sup>** denotes the number of credit unions and credit cooperatives and their branches for every 1,000 square kilometers in the reporting jurisdiction.

**8. Branches of credit unions and credit cooperatives per 100,000 adults** denotes the number credit unions and credit cooperatives and their branches for every 100,000 adults in the reporting jurisdiction.

**9. Branches of other deposit takers per 1,000 km<sup>2</sup>** denotes the number of other deposit takers and their branches for every 1,000 square kilometers in the reporting jurisdiction.

**10. Branches of other deposit takers per 100,000 adults** denotes the number of other deposit takers and their branches for every 100,000 adults in the reporting jurisdiction.

**11. Insurance corporations per 100,000 adults** denotes the number of insurance corporations for every 100,000 adults in the reporting jurisdiction.

**12. Non-branch retail agent outlets of commercial banks per 1000 km<sup>2</sup>** denotes the number of agent outlets that have facilitated transactions for commercial banks for every 1,000 square kilometers in the reporting jurisdiction.

**13. Non-branch retail agent outlets of commercial banks per 100,000 adults** denotes the number of agent outlets that have facilitated transactions for commercial banks for every 100,000 adults in the reporting jurisdiction.

**14. Active mobile money agent outlets per 1000 km<sup>2</sup>** denotes the number of mobile money agent outlets that have facilitated at least one transaction over the past 30 days for every 1,000 square kilometers in the reporting jurisdiction.

**15. Active mobile money agent outlets per 100,000 adults** denotes the number of mobile money agent outlets that have facilitated at least one transaction over the past 30 days for every 100,000 adults in the reporting jurisdiction.

**16. Registered mobile money agent outlets per 1,000 km<sup>2</sup>** denotes the number of registered mobile money agent outlets for every 1,000 square kilometers in the reporting jurisdiction.

**17. Registered mobile money agent outlets per 100,000 adults** denotes the number of registered mobile money agent outlets for every 100,000 adults in the reporting jurisdiction.

## **FAS Indicators: Use of Financial Services**

**18. Borrowers at all microfinance institutions per 1,000 adults** denotes the total number of resident customers that are nonfinancial corporations (public and private) and individuals from the household sector who obtained loans from microfinance institutions for every 1,000 adults in the reporting jurisdiction.

**19. Male borrowers at all microfinance institutions per 1,000 male adults** denotes the total number of male household sector borrowers who obtained loans from microfinance institutions (both deposit taking and non-deposit taking) for every 1,000 male adults in the reporting jurisdiction.

**20. Female borrowers all microfinance institutions per 1,000 female adults** denotes the total number of female household sector borrowers who obtained loans from microfinance institutions (both deposit taking and non-deposit taking) for every 1,000 female adults in the reporting jurisdiction.

**21. Borrowers at commercial banks per 1,000 adults** denotes the total number of resident customers that are nonfinancial corporations (public and private) and individuals from the household sector who obtained loans from commercial banks for every 1,000 adults in the reporting jurisdiction.

**22. Borrowers at commercial banks: o/w households per 1,000 adults** denotes the total number of resident customers that are individuals from the household sector who obtained loans from commercial banks for every 1,000 adults in the reporting jurisdiction.

**23. Borrowers at commercial banks: o/w SMEs<sup>1</sup> (percentage of non-financial corps.)** denotes the number of SME borrowers at commercial banks as a percentage of borrowers from non-financial corporations (public and private) at commercial banks.

**24. Male borrowers at commercial banks per 1,000 male adults** denotes the total number of male household sector borrowers who obtained loans from commercial banks for every 1,000 male adults in the reporting jurisdiction.

**25. Female borrowers at commercial banks per 1,000 female adults** denotes the total number of female household sector borrowers who obtained loans from commercial banks for every 1,000 female adults in the reporting jurisdiction.

---

<sup>1</sup> Small and medium enterprises

**26. Borrowers at credit unions and credit cooperatives per 1,000 adults** denotes the total number of resident customers that are nonfinancial corporations (public and private) and individuals from the household sector who obtained loans from credit unions and credit cooperatives for every 1,000 adults in the reporting jurisdiction.

**27. Depositors with commercial banks per 1,000 adults** denotes the total number of deposit account holders that are resident nonfinancial corporations (public and private) and individuals from the household sector at commercial banks for every 1,000 adults in the reporting jurisdiction.

**28. Depositors with commercial banks: o/w households per 1,000 adults** denotes the total number of deposit account holders that are individuals from the household sector at commercial banks for every 1,000 adults in the reporting jurisdiction.

**29. Depositors with commercial banks: o/w SMEs (percentage of non-financial corps.)** denotes the number of SME depositors at commercial banks as a percentage of depositors from non-financial corporations (public and private) at commercial banks.

**30. Male depositors with commercial banks per 1,000 male adults** denotes the total number of male household sector depositors at commercial banks for every 1,000 male adults in the reporting jurisdiction.

**31. Female depositors with commercial banks per 1,000 female adults** denotes the total number of female household sector depositors at commercial banks for every 1,000 female adults in the reporting jurisdiction.

**32. Depositors with credit unions and credit cooperatives per 1,000 adults** denotes the total number of deposit account holders that are resident nonfinancial corporations (public and private) and individuals from the household sector, at credit unions and credit cooperatives, for every 1,000 adults in the reporting jurisdiction.

**33. Deposit accounts with commercial banks per 1,000 adults** denotes the total number of deposit accounts that are held by resident nonfinancial corporations (public and private) and individuals from the household sector, at commercial banks, for every 1,000 adults in the reporting jurisdiction.

**34. Deposit accounts with commercial banks: o/w households per 1,000 adults** denotes the total number of deposit accounts that are held by individuals from the household sector, at commercial banks, for every 1,000 adults in the reporting jurisdiction.

**35. Deposit accounts with commercial banks: o/w SMEs (percentage of non-financial corps.)**

denotes the number of SME deposit accounts at commercial banks as a percentage of deposit accounts held by non-financial corporations (public and private) at commercial banks.

**36. Men-owned deposit accounts with commercial banks per 1,000 male adults:** denotes the total number of household sector deposit accounts held by men at commercial banks for every 1,000 male adults in the reporting jurisdiction.

**37. Women-owned deposit accounts with commercial banks per 1,000 female adults** denotes the total number of household sector deposit accounts held by women at commercial banks for every 1,000 female adults in the reporting jurisdiction.

**38. Deposit accounts with credit unions and credit cooperatives per 1,000 adults** denotes the total number of deposit accounts that are held by resident nonfinancial corporations (public and private) and individuals from the household sector, at credit unions and credit cooperatives, for every 1,000 adults in the reporting jurisdiction.

**39. Life insurance policies per 1,000 adults** denotes the number of life insurance policies held by resident nonfinancial corporations and individuals in the household sector for every 1,000 adults in the reporting jurisdiction.

**40. Non-life insurance policies per 1,000 adults** denotes the number of non-life insurance policies held by resident nonfinancial corporations and individuals in the household sector for every 1,000 adults in the reporting jurisdiction.

**41. Loan accounts with commercial banks per 1,000 adults** denotes the total number of loan accounts of resident nonfinancial corporations (public and private) and individuals from the household sector that have obtained credit from commercial banks for every 1,000 adults in the reporting jurisdiction.

**42. Loan accounts with commercial banks: o/w households per 1,000 adults** denotes the total number of loan accounts of individuals from the household sector that have obtained credit from commercial banks for every 1,000 adults in the reporting jurisdiction.

**43. Loan accounts with commercial banks: o/w SMEs (percentage of non-financial corps.)** denotes the number of SME loan accounts at commercial banks as a percentage of loan accounts held by non-financial corporations (public and private) at commercial banks.

**44. Men-owned loan accounts with commercial banks per 1,000 male adults** denotes the total number of household sector loan accounts held by men at commercial banks for every 1,000 male adults in the reporting jurisdiction.

**45. Women-owned loan accounts with commercial banks per 1,000 female adults** denotes the total number of household sector loan accounts held by women at commercial banks for every 1,000 female adults in the reporting jurisdiction.

**46. Loan accounts with credit unions and credit cooperatives per 1,000 adults** denotes the total number of loan accounts of resident nonfinancial corporations (public and private) and individuals from the household sector that have obtained credit from credit unions and credit cooperatives for every 1,000 adults in the reporting jurisdiction.

**47. Loan accounts with all microfinance institutions per 1,000 adults** denotes the total number of loan accounts of resident nonfinancial corporations (public and private) and individuals from the household sector that have obtained credit from microfinance institutions (both deposit taking and non-deposit taking) for every 1,000 adults in the reporting jurisdiction.

**48. Men-owned loan accounts with all microfinance institutions per 1,000 male adults** denotes the total number of household sector loan accounts held by men, at microfinance institutions (both deposit taking and non-deposit taking), for every 1,000 male adults in the reporting jurisdiction.

**49. Women-owned loan accounts with all microfinance institutions per 1,000 female adults** denotes the total number of household sector loan accounts held by women, at microfinance institutions (both deposit taking and non-deposit taking), for every 1,000 female adults in the reporting jurisdiction.

**50. Mobile money transactions: number per 1,000 adults** denotes the number of financial payments or transfers to third parties using balances on mobile money accounts via mobile phones, including P2P transfers, bill payments, merchant payments, and international remittances per 1,000 adults in the reporting jurisdiction.

**51. Mobile and internet banking transactions: number per 1,000 adults** denotes the total number of mobile and internet banking transactions carried out by resident nonfinancial corporations and individuals from the household sector during the reference year per 1,000 adults in the reporting jurisdiction. The data is for commercial banks only.

**52. Active mobile money accounts per 1,000 adults** denotes the number of active mobile money accounts per 1,000 adults in the reporting jurisdiction.

**53. Registered mobile money accounts per 1,000 adults** denotes the number of registered mobile money accounts per 1,000 adults in the reporting jurisdiction.

**54. Average number of transactions per active mobile money account** denotes the number of mobile money transactions carried out on average per active mobile money account.

**55. Credit cards per 1,000 adults** denotes the number of credit cards in circulation (excluding expired and withdrawn cards) of all financial institutions per 1,000 adults in the reporting jurisdiction.

**56. Debit cards per 1,000 adults** denotes the number of debit cards in circulation (excluding expired and withdrawn cards) of all financial institutions per 1,000 adults in the reporting jurisdiction.

**57. Outstanding deposits with commercial banks (percentage of GDP)** denotes the total amount (in millions of national currency) of all types of outstanding deposits (transferable and nontransferable) of resident nonfinancial corporations (public and private) and individuals from the household sector with commercial banks as a percentage of GDP.

**58. Outstanding deposits with commercial banks: o/w households (percentage of GDP)** denotes the total amount (in millions of national currency) of all types of outstanding deposits (transferable and nontransferable) of individuals from the household sector with commercial banks as a percentage of GDP.

**59. Outstanding deposits with commercial banks: o/w SMEs (percentage of GDP)** denotes the total amount (in millions of national currency) of all types of outstanding deposits (transferable and nontransferable) of SMEs with commercial banks as a percentage of GDP.

**60. Outstanding deposits with credit unions and credit cooperatives (percentage of GDP)** denotes the total amount (in millions of national currency) of all types of outstanding deposits (transferable and nontransferable) of resident nonfinancial corporations (public and private) and individuals from the household sector, with credit unions and credit cooperatives, as a percentage of GDP.

**61. Outstanding deposits with other deposit takers (percentage of GDP)** denotes the total amount (in millions of national currency) of all types of outstanding deposits (transferable and nontransferable) of other deposit takers, as a percentage of GDP.

**62. Outstanding loans with commercial banks (percentage of GDP)** denotes the total amount (in millions of national currency) of all types of outstanding loans of resident nonfinancial corporations

(public and private) and individuals from the household sector, with commercial banks, as a percentage of GDP.

**63. Outstanding loans with commercial banks: o/w households (percentage of GDP)** denotes the total amount (in millions of national currency) of all types of outstanding loans of individuals from the household sector, with commercial banks, as a percentage of GDP.

**64. Outstanding loans with commercial banks: o/w SMEs (percentage of GDP)** denotes the total amount (in millions of national currency) of all types of outstanding loans of SMEs from the household sector, with commercial banks, as a percentage of GDP.

**65. Outstanding loans with credit unions and credit cooperatives (percentage of GDP)** denotes the total amount (in millions of national currency) of all types of outstanding loans of resident nonfinancial corporations (public and private) and individuals from the household sector, with credit unions and credit cooperatives, as a percentage of GDP.

**66. Outstanding loans with all microfinance institutions (percentage of GDP)** denotes the total amount (in millions of national currency) of all types of outstanding loans of resident nonfinancial corporations (public and private) and individuals from the household sector with all microfinance institutions (both deposit taking and non-deposit taking), as a percentage of GDP.

**67. Outstanding loans with other deposit takers (percentage of GDP)** denotes the total amount (in millions of national currency) of all types of outstanding loans of other deposit takers, as a percentage of GDP.

**68. Mobile money balance value (percentage of GDP)** denotes the total amount (in millions of national currency) of outstanding balances on active mobile money accounts as a percentage of GDP.

**69. Mobile money transactions: value (percentage of GDP)** denotes the total amount (in millions of national currency) of all mobile money transactions carried out during the reference period as a percentage of GDP.

**70. Mobile and internet banking transactions: value (percentage of GDP)** denotes the value (in millions of domestic currency) of mobile and internet banking transactions carried out by resident nonfinancial corporations and individuals from the household sector during the reference year as a percentage of GDP. The data is for commercial banks only.

## Concepts used for normalization

**Adult population** refers to the total population in the reporting jurisdiction of individuals 15 years old and above. Data are taken from the World Bank's World Development Indicators database and the CIA Factbook. In cases where data for the most recent period are not available, data for the previous period is used.

**Male adult population** refers to the total male population in the reporting jurisdiction of individuals 15 years old and above. Data are taken from the World Bank's World Development Indicators database and the CIA Factbook. In cases where data for the most recent period are not available, data for the previous period is used.

**Female adult population** refers to the total female population in the reporting jurisdiction of individuals 15 years old and above. Data are taken from the World Bank's World Development Indicators database and the CIA Factbook. In cases where data for the most recent period are not available, data for the previous period is used.

**Gross domestic product (GDP)** data is presented in millions of national currencies. Data is taken from the World Bank's World Development Indicators database. In cases where data for the recent periods is not available, data for the previous period is used.

**Land area** data is presented in millions of square kilometers. Data is taken from the World Bank's World Development Indicators database. In cases where data for the most recent period is not available, data for the previous period is used.

**Annex I**

| <b>Access to and Use of Financial Services</b> |                                                                              |
|------------------------------------------------|------------------------------------------------------------------------------|
| <b>Geographical Outreach</b>                   |                                                                              |
| 1                                              | Automated Teller Machines (ATMs) per 1,000 km <sup>2</sup>                   |
| 2                                              | Automated Teller Machines (ATMs) per 100,000 adults                          |
| 3                                              | Branches of all microfinance institutions per 1,000 km <sup>2</sup>          |
| 4                                              | Branches of all microfinance institutions per 100,000 adults                 |
| 5                                              | Branches of commercial banks per 1,000 km <sup>2</sup>                       |
| 6                                              | Branches of commercial banks per 100,000 adults                              |
| 7                                              | Branches of credit unions and credit cooperatives per 1,000 km <sup>2</sup>  |
| 8                                              | Branches of credit unions and credit cooperatives per 100,000 adults         |
| 9                                              | Branches of other deposit takers per 1,000 km <sup>2</sup>                   |
| 10                                             | Branches of other deposit takers per 100,000 adults                          |
| 11                                             | Non-branch retail agent outlets of commercial banks per 1000 km <sup>2</sup> |
| 12                                             | Non-branch retail agent outlets of commercial banks per 100,000 adults       |
| 13                                             | Registered mobile money agent outlets per 1,000 km <sup>2</sup>              |
| 14                                             | Registered mobile money agent outlets per 100,000 adults                     |
| 15                                             | Active mobile money agent outlets per 1,000 km <sup>2</sup>                  |
| 16                                             | Active mobile money agent outlets per 100,000 adults                         |
| 17                                             | Insurance corporations per 100,000 adults                                    |
| <b>Use of Financial Services</b>               |                                                                              |
| 18                                             | Borrowers at all microfinance institutions per 1,000 adults                  |
| 19                                             | Male borrowers from all microfinance institutions per 1,000 male adults      |
| 20                                             | Female borrowers from all microfinance institutions per 1,000 female adults  |
| 21                                             | Borrowers at commercial banks per 1,000 adults                               |
| 22                                             | Borrowers at commercial banks: o/w households per 1,000 adults               |
| 23                                             | Male borrowers from commercial banks per 1,000 male adults                   |
| 24                                             | Female borrowers from commercial banks per 1,000 female adults               |
| 25                                             | Borrowers at commercial banks: o/w SMEs (percentage of non-financial corps.) |
| 26                                             | Borrowers at credit unions and credit cooperatives per 1,000 adults          |

|    |                                                                                       |
|----|---------------------------------------------------------------------------------------|
| 27 | Depositors with commercial banks per 1,000 adults                                     |
| 28 | Depositors with commercial banks: o/w households per 1,000 adults                     |
| 29 | Male depositors with commercial banks per 1,000 male adults                           |
| 30 | Female depositors with commercial banks per 1,000 female adults                       |
| 31 | Depositors with commercial banks: o/w SMEs (percentage of non-financial corps.):      |
| 32 | Depositors with credit unions and credit cooperatives per 1,000 adults                |
| 33 | Life insurance policies per 1,000 adults                                              |
| 34 | Non-life insurance policies per 1,000 adults                                          |
| 35 | Deposit accounts with commercial banks per 1,000 adults                               |
| 36 | Deposit accounts with commercial banks: o/w SMEs (percentage of non-financial corps.) |
| 37 | Deposit accounts with commercial banks: o/w households per 1,000 adults               |
| 38 | Men-owned deposit accounts with commercial banks per 1,000 male adults                |
| 39 | Women-owned deposit accounts with commercial banks per 1,000 female adults            |
| 40 | Deposit accounts with credit unions and credit cooperatives per 1,000 adults          |
| 41 | Loan accounts with commercial banks per 1,000 adults                                  |
| 42 | Loan accounts with commercial banks: o/w households per 1,000 adults                  |
| 43 | Men-owned loan accounts with commercial banks per 1,000 male adults                   |
| 44 | Women-owned loan accounts with commercial banks per 1,000 female adults               |
| 45 | Loan accounts with commercial banks: o/w SMEs (percentage of non-financial corps.)    |
| 46 | Loan accounts with credit unions and credit cooperatives per 1,000 adults             |
| 47 | Loan accounts with all microfinance institutions per 1,000 adults                     |
| 48 | Men-owned loan accounts with all microfinance institutions per 1,000 male adults      |
| 49 | Women-owned loan accounts with all microfinance institutions per 1,000 female adults  |
| 50 | Number of mobile money transactions per 1,000 adults                                  |
| 51 | Registered mobile money accounts per 1,000 adults                                     |
| 52 | Active mobile money accounts per 1,000 adults                                         |
